

## Fusion™ Substrates

### **Aluminum:**

Fusion Aluminum is available in several finishes including gloss, mill satin and swirled. It offers high abrasion resistance and fabrication is very straightforward. Ideal for many different applications including walls, backsplashes, murals, artwork, signage and ceilings.

### **LuxCore:**

LuxCore are translucent panels that pass sanitary codes and are easy to clean. Therefore, it is suitable for wet environments such as commercial kitchens and baths. LuxCore resists scratching and is highly durable, making it perfect Wall protection in high traffic areas.

### **Clear:**

Available in Acrylic, Clear PVC or Glass.

### **Wood:**

Fusion Wood is suitable for furniture components, tabletops, walls, fixtures and other interior applications. Now available on Plywood and Hardboard. Imaging into Plywood preserves the beauty and look of the wood and imaging into hardboard shows a vibrant, photo realistic look.

### **FRP (Fiberglass Reinforced Plastic):**

FRP white panels can either be smooth or textured and are available in a variety of thicknesses and sizes. Images are added to the smooth FRP using our Fusion infused color and coating process. The textured FRP is infused with a solid color and hundreds of colors are available.

### **Other:**

We also offer Polycarbonate, Tile, Sintra, Paper or Fabric
